

Goa Broadband Network (GBBN)

Implementing Agency: United Telecom Ltd.

www.goa.gov.in/departments/gbbn.html

GBBN is a high-capacity, end-to-end fiber, next generation network, has been implemented by Goa Broad Band Network in association with Government of Goa to make Broadband services available to entire rural population in all 189 Village Panchayats and 414 villages and towns. Goa has thereby got the distinction of being the only state extending broadband connectivity to 100 per cent Panchayats. It has empowered the panchayats to provide all essential

Government to Citizen (G2C) services, applications and portals which can be accessed through various panchayats and CSCs. The government is in the process of extending broadband connectivity to 2119 schools, 24 colleges, 32 government hospitals and 123 private hospitals which are in a phased manner.

GBBN is the only network where the same network is utilised for government, businesses and citizens. It provides AVVID Structure (Architecture of Voice, Video and Integrated Data) for the Government, all businesses and citizens. It has the capability to provide innovative services on the established infrastructure such as IPTV, Telemedicine and e-Learning.

Goa has become the first State to have IP Based, 10Gb fiber backbone high-bandwidth broadband network which reaches all parts of the State. Laying Fiber of 1400 Kms in the most difficult terrains (laterite soil) across the state was a real challenge which was duly accomplished by the UTL Operation Team within the stringent timelines.

100% broadband coverage across Goa
